Dhaka, Bangladesh | ahammadshawki8@gmail.com | ahammadshawki8.github.io | github.com/ahammadshawki8 | linkedin.com/in/ahammadshawki8

EDUCATION

Bangladesh University of Engineering and Technology (BUET) Expected 2028
BSc in Computer Science and Engineering *Dhaka, Bangladesh*
Coursework: Data Structures and Algorithms I and II, Database, Software Engineering, Computer Architecture, Theory of Computation.

EXPERIENCE

Founder and Developer, SrotDev May 2025 to Present
- Lead an engineering collective shipping production web and mobile apps in React, Next.js, Django, FastAPI and PostgreSQL.
- Architected CareForAll as seven deployable Django services behind an API gateway, with its own Prometheus and Grafana stack.

President of Web and App Development, NDITC Mar 2022 to Jun 2024
- Led a 30-person engineering team; delivered the rebuilt official website and the UI/UX for the club mobile app.
- Raised over 1,000,000 BDT across 100+ sponsor negotiations, and taught web development to more than 500 students.

Founder and Team Lead, The AS8 Organization Feb 2021 to May 2022
- Built a developer community reaching 20,000+ learners; partnered with Codecademy, Hack Club and DeepLearning.AI, and wrote for freeCodeCamp News.

SELECTED PROJECTS

DeepSIFT MCP, Python, Volatility 3
- 148 forensic MCP tools that parse binaries to typed JSON before the model reads them. 4/4 against published ground truth, zero hallucinations, 100% claim grounding.

Momentalk SAM 3.1, Llama, TypeScript
- Everyday photos become speech for people who cannot rely on it. SAM 3.1 outlines every person and object; tapping one speaks. Built for the Meta Global AI Hackathon.

Shoulder Strands Agents, A2A, Python
- Private per-sibling agents negotiate a family care rota. A position may leave an agent; the reason behind it has no field to travel in. Fair division is deterministic.

Cascade Python, AWS, vector search
- Agent memory that expires. Runbooks are pinned to the policy versions they came from, so one edit invalidates every dependent procedure in four writes.

TRACE Python, signal processing
- Heart rate from webcam colour with no trained model, convolution and Fourier only. 4.62 BPM error over 20 volunteers against 5.63 for the best published method.

Someone Snap SPECS, Lens Studio, CLAD
- Hands-free CPR on AR glasses: a sternum target at real size and a ring pulsing at 110 a minute. 37% of trained bystanders who did not help said they panicked.

MACHINE LEARNING COMPETITIONS

CADENCE, Parkinson's from voice ML Empowerment Challenge
- Won best overall project. 30 seconds of voice, validated across three language corpora with cross-database testing and domain-adversarial training.

Bengali LLM hallucination detection IUTCS Datathon 2.0
- Third on the leaderboard at 0.922 F1. A decision ladder resolves most rows against source corpora and a bank of 89,000 questions; only the residual reaches a judge.

DaT Parkinson's Challenge DrivenData
- Tenth on the private leaderboard, 0.2760 log loss and 0.9551 AUROC. Striatum found without an atlas, then binding ratios stacked with 2D and slice-sequence nets.

Phantom Road Gaps, Bias Bounty Humane Intelligence and Zindi
- Highways double-counted across tract boundaries are 72% of the mean road coverage gap, and they bend the equity scorecard built to reveal inequity.

AWARDS

- **Fifth place, Top 10 finalist**, Data Privacy Avengers 2026, Robi Axiata
- **Winner, Golden Agent**, Agents for Humans Hackathon 2026, for Shoulder
- **Grand Prize Winner**, FLIR App Challenge 2025 to 2026, for SolarSnap
- **Best Overall Project**, ML Empowerment Build Challenge 2.0, for CADENCE
- **Best ERNIE Multimodal Application**, Baidu AI Developer Challenge
- **Honourable Mention**, LMA EDGE Hackathon, London finale, for Coven

TECHNICAL SKILLS

Languages: Python, C/C++, TypeScript, JavaScript, Java, SQL, Dart, HTML/CSS

Frameworks: React, Next.js, Django, Django REST Framework, FastAPI, Flask, Node.js, Flutter, JavaFX

AI and Machine Learning: PyTorch, scikit-learn, Model Context Protocol, Google ADK, Retrieval Augmented Generation, Whisper, Gemini, Claude, Pandas, NumPy

Infrastructure: Docker, Google Cloud (Cloud Run, Pub/Sub, Firestore, Vertex AI), AWS (Bedrock, ECS, Lambda), PostgreSQL, MongoDB, Redis, GitHub Actions, Grafana
